

RollPlate® **MANUAL STAR 3-20**

Manual Bush Hammering
Tool for Angle Grinders
Easy to use and lightweight tool

About

The bush hammering system Rollplate® Manual Star 3-20 is a manual bush hammering tool that lets you bush hammer natural stone surfaces (marble, limestone, granite and quartz), also allow you to create non-slip strips.

This tool has a universal M14 socket which can be adapted to most angle grinders that have this type of socket. The tips used in the rollers manufactured by Iberdin®, are high quality tungsten carbide tips, which allows them to have a high performance and therefore great resistance to wear.

Its rollers are easy to replace with the possibility of changing the finish by choosing a type: bush hammered or sanded.

The Rollplate® Manual Star model comes with 3 types of adjustment in the fitting for the supports with the rolls, which allows you to choose to place the rolls on the outermost part of the plate (bigger area of work), or turn them inwards, to be able to work in a smaller area.

Features

Number of Rolls	3
