Company presentation

At Iberdin, we believe in transforming ordinary stone surfaces into works of art. As expertise in the industry, we specialize in the development of bush hammering and sandblasting tools that redefine the artistry of creating textures in stone. Our commitment to excellence and innovation has made us the preferred choice for architects, designers, and craftsmen alike.

Unveiling the Beauty of Stone: Our Expertise

With years of expertise, we have mastered the delicate balance between tradition and technology. Our tools are meticulously designed to enhance the natural beauty of stone, bringing out its unique textures and patterns. Whether you're working on architectural marvels, interior spaces, or landscaping projects, our tools are your key to unlocking the full potential of stone surfaces.

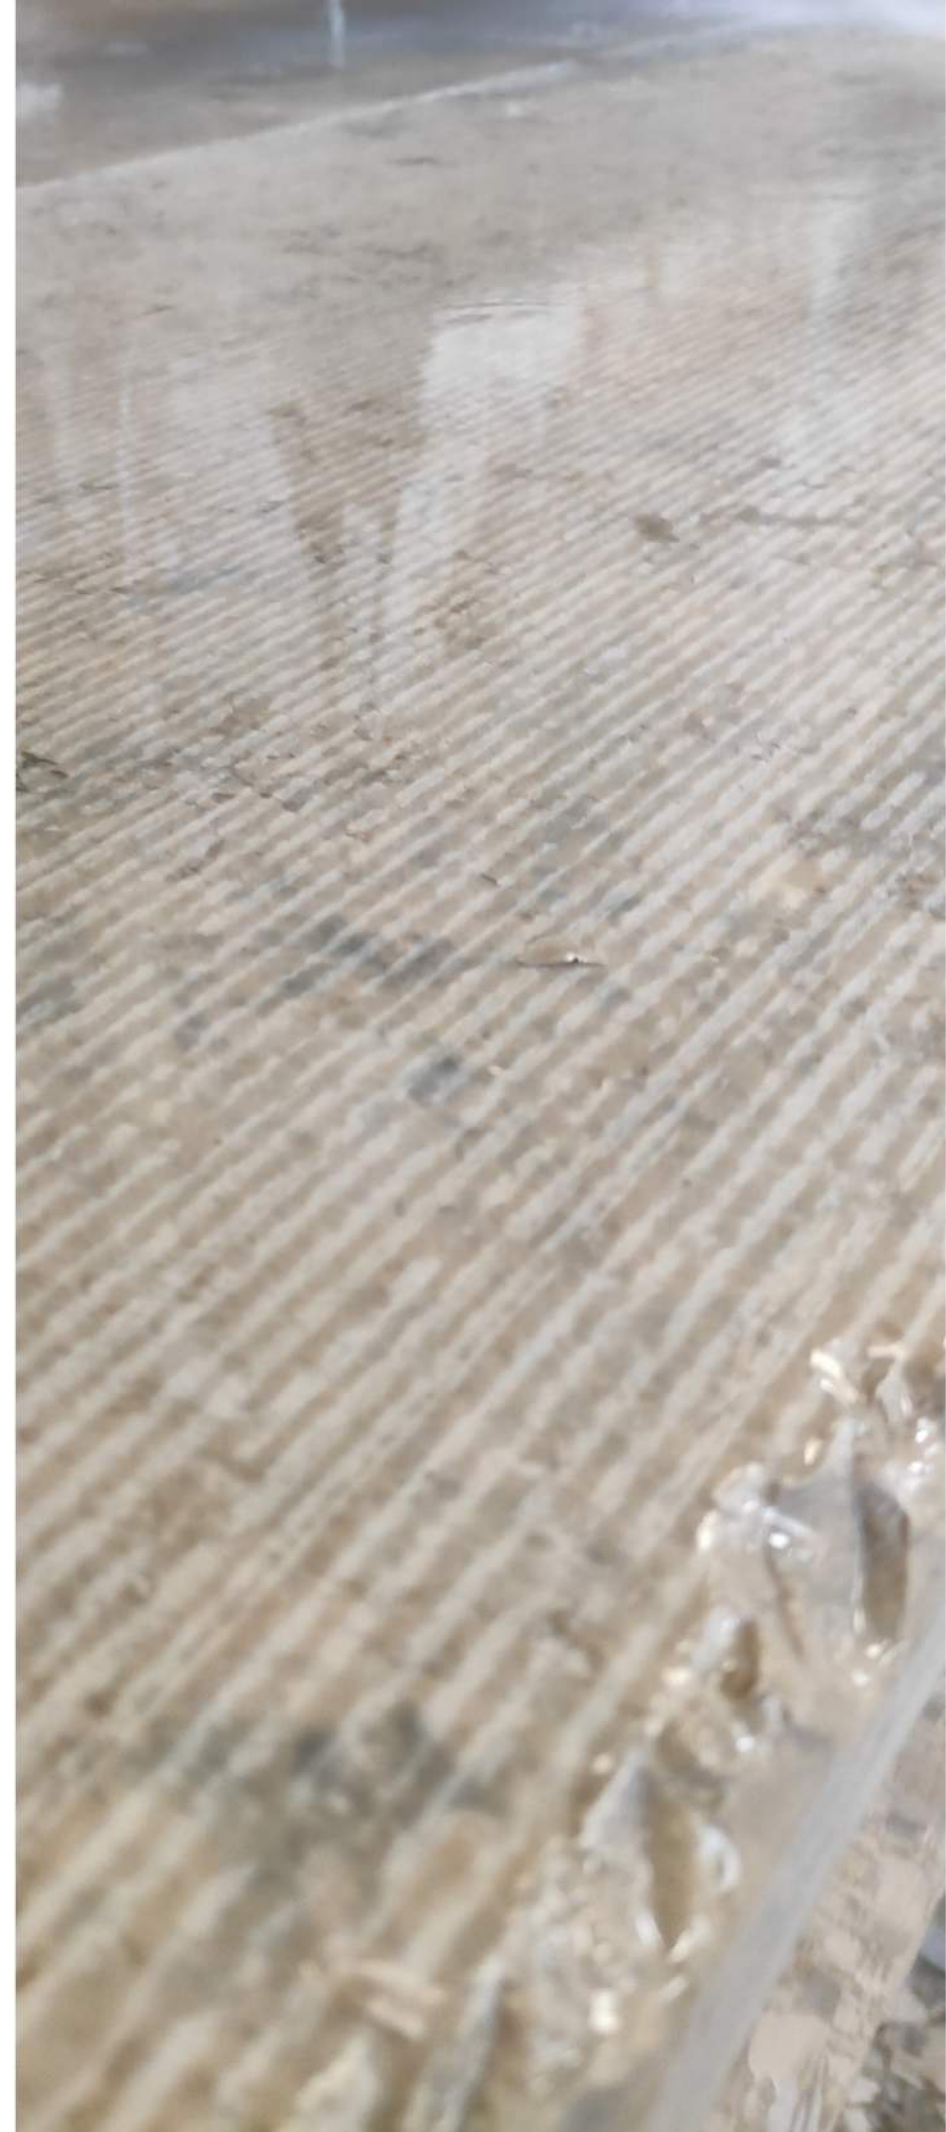

Innovation at its Core: Our Product Range

Explore our comprehensive catalog featuring a diverse range of tools meticulously designed so you can create various stone textures. From rugged and rustic to sleek and contemporary, our products cater to a spectrum of design preferences. Whether you're a seasoned professional or a passionate DIY enthusiast, our tools are designed to empower you to create textures that stand the test of time.

Why Choose Iberdin?

- **Unparalleled Quality:** Our tools are crafted with precision using high-quality materials to ensure durability and longevity.
- **Versatility:** From traditional to avant-garde, our tools cater to a wide range of design styles and preferences.
- **Innovative Technology:** Stay ahead with our tools that incorporate the latest technological advancements in stone texture creation.

As you embark on a journey to elevate your stone projects, trust Iberd to be your companion in craftsmanship. Browse through our catalog and discover the tools that will shape the future of textured stone surfaces

ROLLPLATE MADRID 6 20-4 / 20-5 / 30-4 / 40-4

The bush hammering system Rollplate® Madrid is a bush-hammering tool, which makes it possible to bush-hammer surfaces in natural stone (marble, limestone, quartz and granite). This tool allows an adaptation to an accessory disk with ring to fit stationary machines (older models), or even adaptation through an accessory disk with specific drilling to most (more recent) stationary machines or to another type of automatic polishing machine.

KIT ROLLPLATE INTERIOR

CODE 92001E005

Includes

1 Central Screw With Greasing Cup
1 Bearing
2 Retaining Rins
2 Bushings
2 Oil Seals

KIT NICKING INTERIOR

CODE 92001E006

Includes

1 Central Screw With Greasing Cup
1 Hex Nut
5 Washers
2 Bearings
2 Retaining Rings
2 Bushings
2 Oil Seals

Kits & Spare Parts

KIT ROLLPLATE SUPPORT

CODE 92001E006

Includes

- 2 Supports
- 16 Washers
- 4 Support Screws

KIT ROLLPLATE MAN. SUPPORT

CODE 91901B028

Includes

- 1 Support
- 1 Central Shaft
- 2 Supporting Screws

ROLLPLATE MAN. STABILISING GUIDE

CODE 91901B029

Includes

- 1 Complete Guide With Wheels

ROLLPLATE MAN.STAR SUPPORT

CODE 92101B015

Includes

- 1 Support
- 2 Supporting Screws

ROLLSCRATCHER 300

The scratching roller RollScratcher® is a tool that allows the effect of scratching, or also of anti-skid effect on natural stone surfaces (marble, limestone, and granite). This tool allows it to be adapted to any conventional bridge saw machine or even through the adaptation of an ISO toll holder to a CNC machine. The inserts used in the RollScratcher® models manufactured by Iberdin® are high quality tungsten carbide inserts (for marbles or limestones) or PDC polycrystalline diamond (for very abrasive granites or stones), which allows them to have a high performance and therefore great wear resistance.

HAMMERSTONE MANUAL

The Hammerstone Bush Hammer Manual is a bush-hammering tool that allows the execution of the bush-hammering effect on natural stones, marbles and limestones, quickly and effectively.

Ideal to be used even with the stone already applied to the work, or for finishes that are difficult to access during the production process in your factory.

This tool has a high-quality tungsten carbide insert, which allows them to have a high performance and therefore great resistance to wear. There is the possibility of making different types of bush hammering, depending on the type of tablet chosen,
